Construction Management

“As a licensed contractor I appreciated how the GPRO CM course applied green building principles the whole team could understand.”

– Dan Rondinelli,
Construction Mastery
Institute, Denver, CO

What’s involved in Construction Activity Pollution Prevention (CAPP)? What’s included in a Construction Indoor Air Quality plan or a Construction Waste Management plan?

GPRO *Construction Management (CM)* explains the essential role CMs play on a sustainable construction project. Taught by industry experts using real-life classroom exercises, GPRO CM gives experienced building professionals the critical tools to transition from conventional to sustainable construction practices.

GPRO trained construction management staff can qualify for a LEED point for New Construction projects under LEED Pilot Credit 81. See gpro.org/faqs for more information.

GPRO CM is ideal for a range of construction and real estate professionals including:

- Contractors and subcontractors
- Project managers and site superintendents
- Foremen
- Estimators
- Project architects and engineers
- Building owners and facilities managers

This 12-hour certificate course can be scheduled to meet the needs of your organization. Certificate exam is included.

WHAT STUDENTS LEARN

Part 1: Fundamentals of Building Green

- Economic and health benefits of green building
- Causes and impacts of a changing climate
- Transitioning to sustainable construction practices
- Complying with green codes and standards
- Understanding LEED
- Overview of green building strategies
- The importance of commissioning (systems quality assurance)

Part 2: Construction Management

- The CM’s role in the pre-construction phase of a project
- Integrating green building systems into the construction schedule
- Creating and using tools to implement energy efficiency strategies
- Communicating sustainable construction processes to subcontractors and trades
- Construction Activity Pollution Prevention
- Construction Indoor Air Quality
- Construction Waste Management
- Critical actions to ensure success during the submittals, rough-in, and fit-out phases
- The CM’s role in commissioning (Cx) and working effectively with the Cx agent
- Implementing a post-occupancy review and assessment process

CONTINUING EDUCATION CREDITS

GPRO *Construction Management* qualifies for 10 AIA and GBCI CE Credits. See www.gpro.org/faqs for details.
